

## TECHNICAL DATA

# WEX-PAX II

## HEAVY DUTY PREMEASURED CLEANER CONCENTRATE

**DESIGNED FOR THE TOUGHEST JOBS**

pH VALUE: ..... 10.5 Maximum

SURFACE TENSION: ..... 34 dynes/Cm<sup>2</sup> Maximum

ALCOHOL SOLUBLE: ..... 4.0% Minimum

SEQUESTERING: ..... Clear Stable Solution

PHOSPHATE CONTENT: ..... NONE

FREE ALKALI: ..... NONE

SOAP CONTENT: ..... NONE

ABRASIVE CONTENT: ..... NONE

BLEACHING AGENT CONTENT: ..... NONE

# WEX-PAX II

## A HEAVY DUTY, PREMEASURED, CLEANER CONCENTRATE DESIGNED FOR THE TOUGHEST JOBS

**WEX-PAX II** is a premeasured, dry, heavy-duty detergent with odor counteractant. It contains concentrated blends of detergents, builders, and conditioners, packaged in water-soluble ½ ounce packets, so you get the correct use dilution every time.

**WEX-PAX II** is designed for cleaning floors, walls, equipment, and other hard surfaces. It is lightly scented to leave the area with a fresh clean smell.

**WEX-PAX II** contains biodegradable detergents and is phosphate free. It does NOT contain aldehydes, soaps, abrasives, bleaching agents, or free alkali.

**WEX-PAX II** dissolves rapidly in either soft or hard water, unleashing its well balanced system of detergents, to remove entrapped soil easily with a clean mop, sponge, or cloth.

**WEX-PAX II** is mild. It can be used on delicate surfaces such as marble, terrazzo, washable paint, porcelain, chrome, vinyl, linoleum, stainless steel, glass, asphalt tile, ceramic tile, and rubber.

**WEX-PAX II** is acceptable as a floor and wall cleaner for use in official establishments operating under the Federal meat, poultry, shell egg grading, and egg products inspection program.

### DIRECTIONS FOR USE

For light soil, dissolve one ½ ounce packet of **WEX-PAX II** in 4 gallons of warm water. Stir gently for a uniform solution.

For all routine cleaning, dissolve one ½ ounce packets in 3 gallons of water. For heavy soils, dissolve one ½ ounce packet in 2 gallons of water.

### CONVENIENT and ECONOMICAL
